The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.			
1. A This communication is responsive to 4/5/2007.			
2. The allowed claim(s) is/are <u>Amended Claims 1-34 of the April 5th 2007 Amendment</u> .			
 3. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some* c) None of the: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. 3. Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)). * Certified copies not received: 			
Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application. THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.			
4. A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.			
5. CORRECTED DRAWINGS (as "replacement sheets") must be submitted.

Examiner's Comment Drawings

1. The drawing correction to figure 1 submitted April 5th 2007 is approved by the examiner.

The following is an examiner's statement of Reasons for Allowance:

- 2. With respect to independent claims 1 and 22-24 of the April 5th 2007 amendment and response: these claims are considered to be allowable over the prior art of record because the prior art of record neither discloses nor suggests an MRI magnetic resonance RF resonator / or a field coil for an NMR spectrometer as set forth in Amended independent Claims 1, 22, 23 and amended method of making an MRI magnetic resonance RF resonator as set forth in amended claim 24, because the prior art of record fails to teach suggest or show.
- ---A magnetic resonance radio frequency resonator that generates a radio frequency magnetic field in an active sample volume the magnetic resonance radio frequency resonator comprising:
 - a dielectric substrate and
- a conductive material deposited on the dielectric substrate and forming a plurality of nested current carrying loops each of which has magnetic field generating elements and interdigital capacitor elements the current carrying loops forming a substantially closed geometric path surrounding an inner region that lies adjacent to the active sample volume wherein the magnetic field generating elements form part of the closed geometrical path and substantially all of the interdigital capacitor elements are in a region outside the closed geometric path and are oriented in a direction substantially parallel to the orientation of the magnetic field generating elements.---
- 3. It is the additional feature of "the magnetic field generating elements forming part of the closed geometrical path" with "substantially all of the interdigital capacitor elements" being located "in a region outside the closed geometric path and" being "oriented in a direction substantially parallel to the orientation of the magnetic field generating elements"; which in combination with the remaining

limitations of each of the amended independent claims makes these claims novel over the prior art of record. It is the entire combination of the claim limitations taken as a whole that constitutes both the novelty and non-obviousness of applicant's claims. The prior art of record fail to teach the magnetic field generating elements form part of the closed geometrical path" with "substantially all of the interdigital capacitor elements" being located "in a region outside the closed geometric path and" being "oriented in a direction substantially parallel to the orientation of the magnetic field generating elements.

- With respect to dependent Claims 2-21, and 25-34, these claims are considered to be allowable over the prior art of record, because the each depend from an allowable independent claim.
- 5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art made of Record

- 6. The **prior art made of record** and not relied upon is considered pertinent to applicant's disclosure.
- A) Marek US patent application publication 2002/0190715 A1 published December 19th 2002, filed April 10th 2002.
- B) Marek US patent 6,727,700 B2 issued April 27th 2004, filed April 10th 2002, which corresponds to the Marek US patent application publication 2002/0190715 A1 published December 19th 2002, filed April 10th 2002.

Conclusion

- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tiffany Fetzner whose telephone number is: (571) 272-2241. The examiner can normally be reached on Monday-Thursday from 7:00am to 4:30pm., and on alternate Friday's from 7:00am to 3:30pm.
- 8. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego Gutierrez, can be reached at (571) 272-2245. The **only official fax**
